

UAMS IPE Quadruple Aim Project Proposal Submission Form

The Quadruple Aim Project Proposal is completed by UAMS learners during the Immersion (intermediate) Phase of the Quadruple Aim 3-phase interprofessional curriculum. The purpose is for interprofessional teams of students to work together to develop a project proposal that addresses a problem that relates to the Quadruple Aim. The Quadruple Aim has four goals: 1) patient care/patient experience improvement, 2) population health improvement, 3) healthcare cost reduction or 4) provider satisfaction. The final proposal will be in a format that is ready for implementation or replication by an interprofessional team. **Student teams will submit and present the project proposal and are not be responsible for implementation of the project.**

What would you like to teach, evaluate, and/or implement in your division, department, or organization?? We ask because we have interprofessional teams of students that can help you! Students will be looking for project proposal ideas each year. In an effort to maintain a robust collection of proposal ideas and to assist our campus and community with implementation, we are asking for project proposal ideas. Project proposal ideas are welcome from students, faculty, staff, and our community partners.

Please use the form below to submit project proposal ideas. Forms can be found at www.ipe.uams.edu. Completed submission forms should be emailed to IPE@uams.edu.

Brief description of the problem/goal:	
Which Quadruple Aim goal does/could the project address?	<input type="checkbox"/> Patient care/experience improvement <input type="checkbox"/> Population health improvement <input type="checkbox"/> Healthcare cost reduction <input type="checkbox"/> Provider satisfaction
Description of what has been done, if anything, previously to address this issue.
